

MICHAEL PRIMAK

FULL-STACK DEVELOPER

Hi, my name is Mike Primak. Thank you for taking the time to read my resume. I am an experienced full-stack developer capable across a wide variety of technologies and work environments. I have experience working in small developer teams, taking requirements directly from clients and then coding solutions. I have worked at SaaS companies, where I played a role in a larger team. I have also built complex solo projects which demonstrate my ability to oversee and execute any part of the development process.

WORK EXPERIENCE

Good Fights / Sept 2025 - Present / Remote

Founder & Sole Developer

I was the founder and sole developer, bringing this iOS and Android app to life. I am responsible for the full stack: React Native, TypeScript, Node, Next, Postgres, Prisma, Docker, AI enrichments and all infrastructure. A demonstration of my ability to execute every stage of app development.

LGBT Voice Tanzania / 2024 - Present / Remote

Volunteer Web Developer

Re-built an old WordPress site using a modern WordPress framework. Made the website easier to maintain, nicer looking, and more comprehensive.

Zerion Software / Apr 2024 - Nov 2024 / Remote

Implementation Engineer

I worked with a small team of developers to build custom features for B2B clients. The product was a customizable data collection app. I was on calls with clients gathering requirements and writing custom code solutions.

WellnessLiving Systems Inc. / 2018 - 2020 / Hybrid

White Label App Dept. Coordinator

Coordinated a team of developers, designers and support staff delivering white-label mobile apps to B2B clients. Worked with those clients through delivery: gathering what they needed, translating it for engineering and design, and staying with the account through launch and support.

Self-employed / 2016 - 2025 / Remote

Freelance Web Developer

Built and maintained business websites and WordPress/WooCommerce sites for small and mid-sized clients, owning consultation, design, build, deployment and maintenance.

SKILLS

LANGUAGES

TypeScript / JavaScript / Python / PHP / SQL / HTML & CSS

FRONT END & MOBILE

React / React Native (Expo) / Next.js / Tailwind CSS / WordPress / WooCommerce

BACK END & DATA

Node.js / REST APIs / PostgreSQL / Prisma / MySQL / Web scraping / Data pipelines

ARTIFICIAL INTELLIGENCE

LLM features in production / Output validation / AI-assisted development

INFRASTRUCTURE & TESTING

Docker / Linux VPS / GitHub Actions / Jest / Vercel / Render / App Store & Google Play release

EDUCATION

Georgian College

Big Data Analytics

COVER LETTER BY

MICHAEL PRIMAK

FULL-STACK DEVELOPER

Hi, my name is Michael Primak and I am looking for a full-stack developer position. I am a full-stack developer who builds and runs products end to end: React Native apps on both app stores, TypeScript and Node APIs on PostgreSQL, Next.js front ends, and the Docker and Linux infrastructure underneath them. Most recently I founded and built Good Fights, a fight-tracking app that is kept current every day by automated systems I designed, including LLM features. Above all, I cherish my ability to learn new skills and technologies quickly, to stay current in the evolving world of software development.

I am looking for work as either your solo developer or as a member of a larger engineering team, and I am comfortable in both roles. I can own the whole process, from consulting with clients about their goals, through design, build and deployment, to maintenance. I have also worked on the coordination side, running a team of developers, designers and support staff, so I am used to talking with customers and translating what they need for the people who build it.

I work remotely from Ontario, Canada, on Eastern time, and I use AI coding tools every day as a working practice.

I love making beautiful, functional software products and am eager to find a new place to express my skills. If you are interested in an enthusiastic, positive and talented software developer, please contact me. I would love to meet you, learn about your project and potentially join your organization.

A handwritten signature in black ink that reads "Michael Primak". The script is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
