

MICHAEL PRIMAK

FULL-STACK DEVELOPER

Hello. Thank you for reading my resume. I have built and shipped web and mobile products since 2016, most recently Good Fights, a React Native and Next.js app on both app stores that I designed, built and run alone. My current tech stack includes: React Native apps, TypeScript/Node APIs, PostgreSQL, Next.js and Docker/Linux infrastructure. I am comfortable with AI both as coding partner and integrated into products. I am comfortable with clients, coordinating a team and coding.

WORK EXPERIENCE

Good Fights (goodfights.app) / Sept 2025 – Present / Remote

Founder & Sole Developer

- Design, build, operate. React Native (Expo) on App Store and Google Play. Next.js web. TypeScript/Node REST API on PostgreSQL with Prisma.
- Grew it to 3,600+ registered users, 79,000+ fight ratings and 1,400+ written reviews.
- Built Claude-based enrichment that writes in-app content and SEO targeted articles.
- Run 30+ scheduled jobs on the VPS for scrapers, Brave Search lookups, Claude API enrichment, backups, deduplication and freshness checks.
- Run a production environment: Docker, Render, a Linux VPS, Cloudflare R2 storage, push notifications, PostHog analytics, SEO and over-the-air app updates.

LGBT Voice Tanzania / 2024 – Present / Remote

Web Developer

- Re-built an old WordPress site using a modern WordPress stack. Made the website nicer looking, more functional, more comprehensive and easy for the organization to maintain.

Zerion Software / Apr 2024 – Nov 2024 / Remote

Implementation Engineer

- Adapted a mobile data-collection platform to each client's use case: worked with customers on what they were capturing and how the product should receive and process it, then made the GUI and JavaScript changes to fit.
- Worked as a member of a team on larger projects such as platform changes and developing new organizational capabilities.

SKILLS

LANGUAGES

- ⚡ TypeScript
- ⚡ JavaScript
- ⚡ Python
- ⚡ PHP
- ⚡ SQL
- ⚡ HTML & CSS

FRONT END & MOBILE

- ⚡ React
- ⚡ React Native (Expo)
- ⚡ Next.js
- ⚡ Tailwind CSS
- ⚡ WordPress
- ⚡ WooCommerce

BACK END & DATA

- ⚡ Node.js
- ⚡ REST APIs
- ⚡ PostgreSQL
- ⚡ Prisma
- ⚡ MySQL
- ⚡ Web scraping
- ⚡ Data pipelines & transformation

ARTIFICIAL INTELLIGENCE

- ⚡ LLM features in production
- ⚡ Output validation
- ⚡ AI-assisted development

INFRASTRUCTURE & TESTING

- ⚡ Docker
- ⚡ Linux VPS
- ⚡ GitHub Actions
- ⚡ Jest
- ⚡ Vercel
- ⚡ Render
- ⚡ App Store & Google Play release

WORK EXPERIENCE, CONTINUED

WellnessLiving Systems Inc. / 2018 – 2020 / Hybrid

White Label App Dept. Coordinator

- Coordinated a team of developers, designers and support staff delivering white-label mobile apps to B2B clients. Worked with those clients through delivery: gathering what they needed, translating it for engineering and design, and staying with the account through launch and support.

Fighting Tomatoes / 2016 – 2025 / Remote

Web Developer

- Built and operated the interactive fight-rating web app in JavaScript, PHP, MySQL and Python. This evolved into the Good Fights app.

Self-employed / 2016 – 2025 / Remote

Freelance Web Developer

- Built and maintained business websites and WordPress/WooCommerce sites for small and mid-sized clients, owning consultation, design, build, deployment and maintenance.

SELECTED PROJECTS

- **goodfights.app** - Combat-sports fight-rating platform: React Native, iOS, Android, Next.js Web, TypeScript/Node API, daily automations (scrapers, Brave Search and Claude API processing) and live event tracking. Founded, built and run solo.
- **lgbtvoicetz.org** - Redesigned and built the WordPress site for LGBT Voice Tanzania so a small non-technical team can publish and manage it themselves.
- **meafordosteopathy.com** - Business website with integrated online booking for a local health clinic.
- **avoidjawsurgery.com** - Rebuilt a slow WordPress site as dependency-free static HTML. Made it easier for the owner to maintain with AI tools going forward.
- **michaelprimak.ca** - My personal website. Trying to communicate my friendly personality, extensive experience and eagerness for a new challenge.

EDUCATION

Georgian College
Big Data Analytics

Canadian Academy of Osteopathy
Master of Osteopathic Sciences

Laurentian University
Bachelor of Human Kinetics

WORKING STYLE

Most of my recent work has been solo. I am looking for my first long-term seat on an engineering team.

Experienced gathering requirements directly from clients, coordinating teams and writing code.

Remote from rural Ontario, Canada, on Eastern time.

COVER LETTER BY

MICHAEL PRIMAK

FULL-STACK DEVELOPER

Hi, my name is Michael Primak and I am looking for a full-stack developer position. I am a full-stack developer who builds and runs products end to end: React Native apps on both app stores, TypeScript and Node APIs on PostgreSQL, Next.js front ends, and the Docker and Linux infrastructure underneath them. Most recently I founded and built Good Fights, a fight-tracking app with thousands of users that is kept current every day by automated systems I designed, including LLM features. Above all, I cherish my ability to learn new skills and technologies quickly, to stay current in the evolving world of software development.

I am looking for work as either your solo developer or as a member of a larger engineering team, and I am comfortable in both roles. I can own the whole process, from consulting with clients about their goals, through design, build and deployment, to maintenance. I have also worked on the coordination side, running a team of developers, designers and support staff, so I am used to talking with customers and translating what they need for the people who build it.

I work remotely from Ontario, Canada, on Eastern time, and I use AI coding tools every day as a working practice.

I love making beautiful, functional software products and am eager to find a new place to express my skills. If you are interested in an enthusiastic, positive and talented software developer, please contact me. I would love to meet you, learn about your project and potentially join your organization.

A handwritten signature in black ink that reads "Michael Primak". The script is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
